PUBLIC NOTICES.

PUBLIC NOTICE.

STATE OF NEW YORK.
Board of Railroad Commissioners.
Albany. April 25, 1904.
Application having been made to this Board, under section 59 of the Railroad Law, by the Hudson and Manhattan Railroad Company (proposing to build a tunnel railroad of standard gauge, to be operated by steam, electric or other power, for the transportation of passengers and freight in the city of New York, from a point at or near the intersection of Broadway and Cortlandt street, in the city of New York, to and under the bed of the Hudson river to a point in the boundary line between the States of New York and New Jersey opposite a point lying between Liberty and Fulton streets in the city of New York, where the said railroad is to connect with the railroad of a corporation organized under the laws of New Jersey) for the certificate required under said section, that the provisions of the section have been compiled with by the applicant company and that public convenience and a necessity require the construction of the applicant company's railroad, NOTICE is hereby given that a public hearing on said application will be held by this Board at its New York office, room 406, Whitehall Building, 17 Battery Place, New York city, on Wednesday, May 11, 1904, at 10:00 o'clock A. M.

By the Board.

GEORGE W. ALDRIDGE.

Secretary, Board of Railroad Commissioners.

J. J. F.

WHITE NEWS SLIPS

DOW, JONES & CO.,

THE WALL STREET JOURNAL.

Sealed Bids for the purchase of the Insular Cold Storage and Ice-plant located at Manila. Philippine Islands, will be received on or before the 7th day of June. 1904. The plant includes one of the most valuable locations in the City of Manila, on the Pasig Rilyer, occupying the whole space between the Suspension and the Santa Cruz Bridges, with abundant water frontage, and in the Immediate vicinity of business center. The buildings and machinery are in every respect new and modern, completed in the year 1901. The sale will include the land and water transportation belonging to the plant, including insulated lighters and barges, delivery wagons, horses and harnesses. For the fiscal year 1903 the total revenue of the plant was \$352.194.17; total expenditures for the same period \$196,836.85, leaving an excess of revenue over expenditures of \$133.855.31 United States money. The plant as a Government institution does not compete with private establishments of a like character in the hands of a private corporation. The income could be very largely increased. Nobid for less than \$1,000.000 United States money will be considered. Bids will be received on the basis of an unrestricted sale, and also on the basis of an agreement on the part of the purchaser to furnish loe to civil employees for five years at the present Government rate of one-haif cent per pound, gold. The right to reject any and all bids is reserved. Each bid must be accompanied by a certified check payable to the Government of the Philippine Islands for 5 per cent. of the amount of the bid as security for the fulliment of the contract, should the bid be accepted Terms: Payment to be one-third cash and be balance in three equal annual installments, at 6 per cent. Interest per annum. The unpaid portlon of the purchase money to be secured by mortgage on the property, or by other satisfactory security. Bids may be filed with the Scretary of Finance and Justice at Manila. All bids must be filed before 10 o'clock noon June 77th, 1904, at which time the bids w Room 1219. North American Building,
Philadelphia, May 5. 1904.
To the Stockholders of The Consolidated Lake
Superior Company:
The Reorganization Committee of The Consolidated Lake Superior Company hereby gives notice
that the Plan of Reorganization, dated October 20,
1903, has been declared operative.
The Committee is enabled to take this action
by reason of the fact that it has entered into an
Agreement with the Canadian Improvement Company for the underwriting of so much of the original 38,000,000 called for as is not taken by Stockholders, or other underwriters, subject to the
following conditions:
In order to enable the Canadian Improvement
Company to make partial provision for this underwriting obligation that Company has secured
from the Government of the Province of Ontario,
a guarantee on the part of said Government of
a loan of \$2,000,000, to secure which the Government has required that there be deposited with
a Trustee all of the stocks and bonds of the Algoma Central & Hudson Bay Rallway Company,
all the stocks and bonds of the Manitoulin and
North Shore Rallway Company, and the note
of the Algoma Commercial Company, Ltd., and
by The Consolidated Lake Superior Company,
and ascured by Mortgage on certain vessels and
shipping property, to be held by the Trustee as
collateral, until the payment of the loan, which
matures on May 1, 1908, at which time said stock,
bonds and other securities are to be delivered
to the Trustee of the mortgage given by the
New Company to secure its first Mortgage bonds.
The Provincial Government of Ontario receives,
as further security, the deposit with the Trustee of the amount of rist Mortgage Bonds, income bonds and stock of the Reorganized Company, which the sum of \$2,000,000 in money would
be entitled to receive in underwriting under the
Plan of Reorganization.
The payment of this loan on or before its maturity, and the return of these securities to the
Reorganization Committee or Its successor, is
guaranteed by the Canadian Improvement Company wh

Houston Oll Company of Texas. REORGANIZATION.

The undersigned, at the request of holders of Preferred and Common stock of the HOUSTON OIL COMPANY OF TEXAS, have consented to act as a committee to protect their interests, and to formulate a plan of reorganization.

come bonds and stock of the Reorganized Company which have been so deposited to further secure the Provincial Government of Ontario, as stated.

The Collateral Trust Mortgage to be given to secure the first Mortgage bonds of the Reorganized Company will be so drawn that all equity over and above the lien of the said \$2,000,000 on the said bonds and stock of the Algoma Central and Hudson Bay Railway Company, and the Manitoulin and North Shore Railway Company will be covered thereby, and upon repayment of the loan the collateral trust mortgage will become a first lien thereon.

The Canadian Improvement Company also undertakes that, after all expenses, fees and commissions of the Reorganization have been paid, the new Company to be formed shall have a clear working capital of \$1,000,000 in cash over and above and exclusive of raw material and partially worked-up material on hand; and it has been agreed with the Canadian Improvement Company that if, in order to provide such cash working eapital, it becomes necessary for the Canadian Improvement Company that if, in order to provide such cash working eapital, it shall be entitled to receive for such additions to the maximum amount of its underwiting obligation, it shall be entitled to receive for such additional sum first mortgage bonds of the new company at the price of 70 per cent. of their par value.

The agreement with the Canadian Improvement Company, however, provides that certain secured claims against The Consolidated Lake Superior Company and subsidiary companies not exceeding \$600,000 in amount need not be liquidated at present, but may be extended for a period of three years on the security now held by them.

Stockholders who have deposited their stock are required to pay the balance due by them to the depositary. Fidelity Trust Company, No. 325 Chestnut Street, Philadelphia, Pa., or the Morton Trust Company of New York, on or before that the stockholders of The Consolidated Lake Superior Company who have not hereto fore subscribed to the underwriting or d Holders of Preferred stock and of Common stock of that Company are invited to deposit the same with the MANHATTAN TRUST COMPANY, We will street, New York, or the OLD COLONY TRUST COMPANY, Ames Building, Boston, Mass., under an agreement, copies of which may be obtained from either depositary. Certificates of deposit will be issued to depositors.

In view of the suit already begun, and the ap-pointment of receivers of the Houston Oil Com-pany of Texas and the Kirby Lumber Company, it is important that deposits of Preferred and Com-mon stock be made at once

New Underwriting will be allowed to a limited extent.

Those who have underwritten and paid 5 per cent. will be required to pay 45 per cent. on or before May 17th, and the balance on call.

New Underwriters will be required to pay 50 per cent. of their underwriting at time of subscription on or before the 17th of May and balance on call.

Notice of these changes in the original Plan of Reorganization has been given to the Fidelity Trust Company, as required by the terms of the Reorganization Agreement, which notice may be inspected at the office of said Company.

JOHN W. MOFFLY, Chairman. DATE FOR RYAN-CRIPPS MILL. Pair to Fight at Colma, Cal., for Middleweight Title on June 16.

Everything has been satisfactorily arranged for the appearance of Arthur Cripps of Australia at San Francisco. According to a despatch which his manager, Sam Fitzpatrick, has received from Harry Corbett, Cripps is to face Tommy Ryan on June 16, before the Colma A. C., Colma, Cal., twenty rounds for the middleweight championship of the world The men are to weigh in at 158 pounds in costume in the ring in the presence of the spectators. This is rather novel as far as weighing in is concerned and the innovation is likely to be a success. Heretofore all pugilists, especially those who have fought in San Francisco, have gone on the scales at 3 o'clock or a little later in on the scales at 3 o'clock or a little later in the afternoon.

This will be Cripps's first appearance in this country in a long fight. He is a clever man and a stiff puncher too. Fitzpatrick is confident that Cripps will whip Ryan. Sam will start for California on Tuesday next. June is is the night before the Jeffries-Munroe fight and the Colma people expect to get most of the patronage from those who will come to California to see the big men fight. As the Cripps-Ryan mill is an international one it should draw on its own account. TME DELAWARE AND HUDSON COMPANY New York, April 1, 1904.

Notice is hereby given that the Annual Meeting of the Stockholders of THE DELAWARE AND HUDSON COMPANY will be held at the office of the Company, No. 21 Cortlands Street, in the Borough of Manhattan and City of New York, on Tuesday, the 10th day of May next, at welve clock noon, for the election of Managers and for other business.

At the same time and place a Special Meeting of the Stockholders of THE DELAWARE AND HUDSON COMPANY, called by order of the Board of Managers, will be held for the purpose of considering and acting upon the question of ratifying and confirming the lease of the railroad, franchises and other property of The Chateaugay & Lake Placid Railway Company.

The polis will be open at 12 o'clock noon and will remain open for at least one hour.

The transfer books will be closed from the close of business Saturday, April Soth, until the moraling of Wednesday, May 11th.

By order of the Board of Managers.

IRON ORE PRICES ARE LOW.

NON-BESSEMER MINE OWNERS MAKE COMPLAINT.

Rate Fixed by the Ore Association Will Force the Closing of Some Properties -New Production Record in the Lake Superior Copper District Made in April.

DULUTH, Minn., May 4 .- The price of Lake Superior ores, as fixed by the ore association, is so low that there is not a non-bessemer mine in the Mesaba district that can make a dollar, and very few of them can come out even. This price of \$3.50 a ton, delivered at Cleveland, means only \$1.90 for standard bessemer at the mine, and the price of non-bessemer is from 50 to 75 cents a ton under bessemer. The cost of mining and royalties on the latter is more, in most cases, than the miner will get. There is no chance of a re-duction in transportation charges and mining wages will scarcely be out a cent. There are many of the better bessemer mines that will be unable to make any profit at this price. and some of them are already shutting down indefinitely. This is especially true of mines on the Gogebic range, which are deep, and where mining and royalties are expensive. No such price can stand for very long, and it it had not been for one crowd of independent

operators would not stand a minute.

The two largest mines at Ely, Vermillion range, are closed on account of a strike. The men demand the discharge of the superintendent, whom they do not like. The two mines affected have large stocks of ore on the surface, and are in no great demand at this time.

this time.

No ore ships have moved at any of the ports along the Lakes, and few vessels have begun fitting out for the season. This is due to unsettled conditions of labor among vessel crews, and a struggle for the mastery be-tween the rival unions controlling the two ends of the ships, that of the masters and that of the engineers. Owners are sitting back waiting for these elements to come together, and are much pleased, as every week of deand are much pleased, as every week of de-lay now means more chance to earn a fair return for the year. Ice still remains in many of the upper Lake harbors, but it is rotten and a big ship could navigate with

are reopening and stripping is being re-sumed on contracts held over from last year. The money voted by the Ontario Govern-ment for the assistance of the Sault industries is to be paid over in a short time, and the details of reorganization are about perfected.
It is undersood that the first industries to be resumed will be the pulp mills and the mines, iron at Michipicoten and nickel at Sudbury The nickel reduction works, the new blast furnaces and the steel rail mills will be put in operation as quickly as possible. The mills have assurances of long and profitable rail contracts, and a \$7.50 duty is to go on imported rails as soon as these works, or any other in Canada, are ready to make rails. other in Csnada, are ready to make rails.
Explorations on Hunter's Island, north
of Minnesota, have been made by the International Iron Company of Duluth and the
company announces the discovery of what

may prove a very large and valuable mine. Lackawanna Steel Company interests that have been opening the Scranton mine near Hibbing, have closed the property. Too much water to permit mining at the price of

ore this year is given as the cause.

The Lincoln mine at Virginia, belonging to Jones & Laughlin, has commenced small shipment of ore to docks, being the first Mesaba mine to send out its product.

HAKE SUPERIOR COPPER.
HOUGHTON, Mich., May 4.—The April production of copper by the Lake Superior mines was the largest ever secured in one month in the district. The influence of the large production of the four big new mines is very plainly noticeable in the totals, and these plainly noticeable in the totals, and these mines, the Mohawk, Baltic, Trimountain and Champion, are by no means arrived at their full productive capacity. That the Lake district as a whole is increasing its output, rather than falling behind is due to the influence of the new mines opened within the last five or six years.

Within ninety days the Franklin will be able to increase the amount of rock stamped from the Franklin Junior. The old mine continues to supply considerable rock, but this is of varying grades, ranging from much from any of the mine openings down to lean rock considerably under the

down to lean rock considerably under the grade of the none too rich conglomerate mined at the Junior.

The local pool has been completed, the money is in the bank and exploratory work will be begun within a week or two on sec-ion 15, lying next east of section 16, on which the Atlantic company worked for several years in a vain effort to locate the northern extension of the Baltic amygdaloid lode. The opinion of a majority of the best judges of the district is favorable to the section 15 projects, they believing that the northern extension of the amygdaloid bed outcrops on section 15, rather than on section 18. The work will be watched with keen interest by the management of both the Atlantic and Isle Royale mines, and the finding of the lode on section 15 would probably enable the Isle Royale people to pick up the strike of the lode on sections 10 and 11, where some exploratory work has been done during the

last two seasons. The Phoenix mine is turning out mineral at the rate of 100 to 115 tons a month. This is a small amount, compared with what the big mines are doing, but the costs of production are on a corresponding scale, and the Phomix is meeting the expectations of its friends. The growth of the towns of Baltic, Tri-mountain and Painesdale is marked. Six mountain and Palnesdale is marked. Six years ago there were not to exceed 100 people living where these thriving young towns now boast a joint population of nearly 10,000.

The new reduction plant of the Michigan Smelting Company, two miles west of Houghton, is nearing completion and should be blown in by August. The plant is much the largest and most modern in the district.
and is quite certain to make a new low record

of smelting costs.

The Centennial company has taken possession of the Arcadian mill, and is to have one stamp in commission in July. ARIZONA COPPER MINES.

one stamp in commission in July.

ARIZONA COPP ER MINES.

HOUGHTON, Mich., May 4.—Of the local companies operating in the Warren district of Arizona, the Lake Superior and Pittsburg will be turned from a delvelopment into a fully organized mining company next month. The immense ore bodies opened in this mine during the last year have long since removed it from the class of prospects, and it is sure to make another and perhaps a larger Calumet and Arizona. The Calumet and Pittsburg has a little ore, with good prospects of soon reaching the main ore bodies. The Junction is sinking a large shaft of full working size, and its management appears certain of success. Developments on the Pittsburg and Duluth have not shown ore as yet, but the property is so located that the striking of good ore bodies within a few months is expected.

All of the foregoing properties are of the Calumet and Arizona group, but outside of the "royal family" there is less activity. Too many development companies were organized here a year ago, some of them with indifferent lands and the majority with inadequate finances. The Wolverine and Arizona is among the strongest, and has excellent prospects of making a mine. Sinking and drifting are under way, and diamond drills are under way, and diamond drills are also employed. The Higgins is running two diamond drills, but does not seem to have located the extensions of the small ore bodies cut some weeks ago. The Portage Lake and Bisbee and Calumet and Cochise, both well located properties, do not seem to have found anything of value yet. The Marquette and Arizona discovery of ore turns out to have been cores of low grade auriferous quartzite, rather than the copper ore expected. At the other Bisbee properties owned by local capital there seems to be nothing new from week to week.

The Mitchell Development Company, oper-

STATION & SINKING MINING PUMPS.
Over 60,000 CAMERON pumps in daily satisfactory use all over the world gives tangible proof of their merit and confirms the claim for their superiority over all others. They are conceded to be the most durable, reliable and effective mining pumps on the market to day, and while often imitated are never equalied. For proof, inquire of any mining engineer; for catalogue and prices, write any of our resident agents or direct to the

A. S. CAMERON STEAM PUMP WORKS,

ating in the Huachuca Mountains, twenty-five miles west of Blabee, is developing vigorously, and has opened considerable ore. The Chiricahua Development Company, which is opening a mine in the Chiricahua range, thirty miles northeast of Blabee, has one of the most promising prospects opened for some years outside of the old copper fields of the territory, and the Chiricahuas promise to give another big copper producing district to Arizona within the next few years.

few years.

MONTANA.

BUTTE, May 2.—The latest rumor, coming from a source more than usually reliable, is that negotiations are again on for a settlement of the copper war between the Amalgamated company and F. A. Heinze. For years the Amalgamated company has been mining its rich properties only to turn its profits to the payment of litigation expenses and costs in Montana politics, while Heinze has been mining his own property and that of his neighbors' to get means to carry on his end of the war. The waste has been disustrous to both, and it is said that both are getting weary of it. B. B. Thayer, the new manager of the Amalgamated company, is making a thorough investigation of conditions in Montana, and much will depend on the report he will make to the Amalgamated officials in New York.

The Iduna, owned by James A. Murray, the banker, has been leased to Butte men and the shaft is being sunk rapidly. The present depth is 300 feet. This mine has always been a steady producer and some very rich ore is being taken out now. Sinking will be continued until the 600 level is reached. The Inuda is located just east of the Belmont, owned by F. A. Heinze

The shaft on the Cora mine, Heinze's property, is being sunk from the i,400 to the i,500 foot point. The vein of the Cora at the 1,400 foot level is about 33 feet wide, but the ore is not high grade. The property is being worked on an extensive scale, as it is one of the Montana. Ore Purchasing Company now receives its supply of ore.

The Tzarina, west of Missoula gulch, after

this mine at which time a large with wire gold and silver were taken out. The old shaft was about 1,000 feet west of the new one.

Operations on the Zeella mine, owned by the Anaconda Mining Company and being worked under lease by Perrie Delmas, have been suspended indefinitely. Ten days ago the lessee was notified that the company wanted possession in ten days. When Delmas was notified he was working a crew of forty men, which he at once increased to ninety, with the result, it is said, that he is \$50,000 ahead, \$20,000 of which was taken out the last ten days of work.

A vein of ore sixteen feet wide has been struck on the Bee Hive claim near Bannack, Beaverhead county. The property is one of the oldest in Montana, having been staked in 1862. The body of ore struck is said to be free milling gold, carrying an average value of \$10 to \$12 a ton.

Helena, May 2.—Dr. Johnson of St. Paul, president of the Occidental Mining Company, has been in Helena inspecting the large group of claims recently taken over, and which adjoin those of Senator Gibson and J. J. Hill. As a result, orders have been given for the vigorous development of the properties, which are the scene of a recent rich high grade silver-lead strike. It is said that Mr. Hill intends to run a branch from the Great Northern at Clancy to tap the new field. Work is progressing on the Hill-Gibson properties, a 20-foot vein of silver-copper ore being the latest strike.

A splendid copper-silver strike has been made at a depth of 200 feet in the claim of the New York and Montana Company in the Wickes-Corbin district, fifteen miles south of Helena. This property was recently secured from the McCabe syndicate. The Copper Mountain Company, operating in the same district, is also making a splendid showing, with good indications for a permanent copper body.

The Ophir district, in the Big Blackfoot country, northwest of Helena, will enter the list of shippers this year. A large number of claims are being developed.

The company organized to develop the Whitlatch-U

Articles of incorporation of the Cokedale Coal Company have been filed with the Secretary of State to develop Park county coal properties, as well as to develop water power and electric power and build gas works, &c. The main office of the company is to be at Augusta, Me. Among the incorporators are William R. Barbour of Yonkers, N. Y. I. L. Fairbanks and J. Berry of Augusta, Me., ex-Gov. S. T. Hauser of Helena, Edwin O. Holter of New York and A. M. Holter of Helena.

COLORADO SPRINGS, May 4.—The April output of the Cripple Creek mines reached 58,800 tons of ore of \$1,551,400 gross value. The increase over the March record was 3,800 tons, worth \$150,000. The average value of 4,500 tons treated by the Homestake and of 2,100 tons treated by the Sioux Falls cyanide mills was \$4 a ton. The successful handling of the low grade ore is a feature of present day mining at Cripple Creek. It is in contrast to the record made by the Dorcas concentration plant, whose 2,200 tons averaged \$70 each. The smelter ores averaged \$60 each for 11,000 tons. The United States Reduction and Refining Company treated 22,000 tons of \$25 average value. Other mills treating the April product were; Portland, 9,000 tons, worth \$28 a ton: Telluride, 5,000 tons, worth \$25 each; Economic, 3,000 tons, worth \$25 each; Economic, 3,000 tons, worth \$25 each; Economic, 5,000 tons, worth \$7,000,000 gross.

The American Eagles mine on Bull Hill has reopened. The shaft is the deepest in any part of the camp, 1,400 feet. The mine belongs to the Stratton estate.

Stratton's Independence mine, according to the Venture Corporation of London, owner, is yielding about 750 tons of \$44 ore weekly.

SEATILE, Wash. May 2.—The Yukon trails are now seas of mud. Only those who are actually compelled to travel take to the roads. This condition will prevail for a week or two, when the lakes and rivers will be free and navigation will be resumed.

Among the companies arranging for a lively mining season is the old North American Transportation and Trading Company, which has large properties on Bonanza and Miller creeks, and which intends employing 350 men this spring.

There is a stampede to the hillside claims on the left limit of Sulphur Creek and stakes are being driven at a lively rate. Those engaged in the business expect a busy time on this creek and think the clean-up will equal any in the prosperous days of the camp. Dawson people have participated in this rush.

No 37 Eldorado is working under lease this

equal any in the prosperous days of the camp. Dawson people have participated in this rush.

No. 37 Eldorado is working under lease this spring to Maynard & Hafstad, who estimate that they have 9,000 buckets of pay in their dump. Some pans went as high as \$84.

Within the last week New York men have bonded, or bought outright, all the ledge and placer tin mines in York district, paying 10 per cent. down. Prices were not questioned, so eager were the purchasers to take all tin in sight.

CALIFORNIA.

CALIFORNIA.

SAN FRANCISCO, May 2.—Miners who have made a study of dredging by the new process estimate that the town site of Oroville, in Butte county, contains \$15,000,000 in gold, which can be exported readily by dredging. This calculation is made from the results of dredging the land immediately adjoining the town Many fine orchards adjoining the town Many fine orchards adjoining the town Many fine orchards adjoining Oroville have been bought at from \$500 to \$1,000 an acre by miners, who have cleared off the trees and worked over all the soil down to bedrock, making large profits. As much as \$500 an acre has been paid for ordinary sheep pasturage which five years ago could have been bought for \$15 an acre. As the town site of Oroville is valued at only \$2,000,000, several miners are figuring on forming a syndicate to buy the town and remove all the wooden buildings to Palermo, just across the Feather River. There would be big money in the novel proposition.

The diversion of a large river will be attempted near Douglas City, Trinity county, this summer. Where the Trinity River makes a horseshoe bend the water will be drawn off through a tunnel, and one mile of the river channel will be drained and the rich gravel will be worked. The tunnel will be 800 feet long, 11 feet wide and 7 feet high, and it will have fall enough to carry the water in the river at its ordinary level. At this place in Trinity county rich placers were discovered in the early days, and the bed of the river, like the beds of the Feather and the Yuba rivers, should be very rich. In the Del Monte mine, Calaveras county, a ledge of quartz has been struck 1,048 feet from the mouth of the tunnel. The engineers calculated that the ledge would be found at 1,040 feet. The tunnel meets the ledge 800 feet below the level of the shaft, and it has been driven through the hardest kind of rock, costing \$50,000. The quartz prospects well in free gold NEVADA.

NEVADA.

RENO. May 2.—On Gold Reef, two and a half miles southeast of field Mountain, nine miles from Tonopab, a ledge carrying mineral has been struck at two feet from the surface. The rock is porphyry carrying what resembles black manganese oxide. The highest assay is \$370 in gold and others run from \$8 to \$40 in gold. It is out in the open desert and is regarded as a continuation of some of the rich Tonopah ledges. The group in which the strike was made is known as the Rattler.

The first strike in this district was made in the Conglomerate group a month age.

At Goldfields, the new camp near Tonopah, the lessees of the January mine have shipped 275 tons of ore that will net \$150 a ton. There is also on the dump upward of 1,500 tons, which will average \$30. The vein shows a width of 35 feet of ore at the bottom of the shaft. shaft.

The Combination claim, which adjoins the January, has its shaft down 170 feet and drifts are being run both ways. The ore is changing from exides to sulphides. The value of the sulphides is \$300 a ton. Stoping has been begun on a four foot streak of ore on the 80 foot level.

OBEGON.

has been begun on a four foot streak of ore on the 80 foot level.

PORTLAND, May 2.—The greatest strike for rionness of gold ever made in Oregon at depth has just been encountered in the Bonanza mine, near Greenhorn. Baker county. The Bonanza has attained the greatest depth of any in the State, being down 1,200 feet in a perpendicular shaft. A body of ore was found at the deepest workings, of which five tons was brought to the surface, and this netted the company 364,860, or an average of nearly \$13,000 aton. The Bonanza is the greatest gold producer in the State and last year extracted over \$1,500,000 from the workings. The company is a close corporation and is wined by New Yorkpeople.

Word reached here this morning of the sale by Portland people of 2,500 acres of coal and cil lands near Kayak, Alaska, to San Diego, Cal., people for \$1,000,000. The coal thus far opened up is a semi-anthracits and is of great importance to the North Pacific towns for manufacturing purposes. The fields are only three miles from the eccan beach.

The passage of the bill in the United States Senatz for the establishment of a branch of the United States Assay Office at Portland is gratifying, as hereafter Oregon will be credited with her entire production by the Director of the Mint. In the past over five-sixths of the gold in the State was sent to the Overnment assay offices at San Francisco, Boise and Seattle.

The Blue Ledge mine in Josephine county has been sold to Spokane men by Dr. J. F. Reddy for \$250,000. The mine has been worked by different owners with varied success. The last was Patrick Clark, a brother of Senator Clark of Montana. He spent nearly \$100,000 in development of ore bodies, but was dissatisfied with the showing and let the property revert to its original owners. The ore is a copper sulphide, carrying good values in gold, and the ledge is thirty-eight feet wide at the 400 foot level. It is the intention of the new owners to begin active work and install machinery which will cost \$75,000. It was discovered in

SEATTLE, MAY 2.—The Wayside mine in the Sultan district, is now under bond to Eastern capitalists, and is shipping about thirty tons a month of selected ore to the Everett smelter. It is thought the output can be increased to a car a day.

The New York and Seattle Mining Company, operating in Silver Creek district, Snohomish county, thirty miles from Everett, is now constructing a wagon road nine miles in length to connect with the Great Northern Railroad at Index, and will begin shipping ore to the Puget Sound smelters.

BRITISH COLUMBIA.

ore to the Puget Sound smelters.

BRITISH COLUMBIA.

SEATTLE, May 2.—The Ominica district, on the proposed extension of the Grand Trunk Railway, is again attracting the attention of prospectors, miners and capitalists, after being neglected for ten years. The mines consist of iron, gold, silver, copper and platinum—the latter being mistaken, by the old time prospectors for nugget silver, being found associated with gold nuggets in the clean-up of the sluice boxes.

UTAH.

SALT LAKE, May 2.—The April output from Utah mines was close to \$3,000,000. The mines known as regular producers are doing better than ever, and they are constantly being reenforced by new discoveries and developments. IDARO.

BOISE, May 2.—Spear's American Exchange, a New York organization, has become the owner of two groups of claims in Yellow Pine Basin, southwest of Thunder Mountain, Each group consists of six claims. The deal also included \$40 acres of placer ground. A company called the Johnson Creek Mining Company has been organized to work the property.

Company has been organized to work the property.

C. L. Ricketts has opened a ledge on Five Mile, near the Idaho City road, that shows thirty-three feet of ore averaging over 36 per ton The ore is concentrating.

The discovery of rich platinum ore in the mines on Owl Creek, Lemhi county, is not the least important of the rich finds made there. A chunk of the ore recently analyzed at Butte gave returns of \$3,000 to the ton Great Britain's Racquet Champion

An old-time favorite came back to form COLORADO SPRINGS, May 4.—The April outout of the Cripple Creek mines reached 58,800

H. K. Foster, who held the championship

April 23 and 25 in the Queen's Club, when H. K. Foster, who held the championship from 1894 to 1900, suc ceeded in regaining the title. He defeated Eustace H. Miles in the first round 18-8, 18-11, and the holder, E. M. Baerlein, by 17-14, 15-7, 18-12. Field's comment is:

18 was certainly a great feat to come through the competition without the loss of a game. In last Saturday's match Miles, in spite of his quickness and his natural talent for games with racquet and ball, was clearly outplayed, his opponent being not only greatly superior in style, but also in severity. Foster's return of the service was wonderfully fine and prevented his antagonist from making long innings, while his knowledge of the game enabled him whenever he gained an advantage in a rally to increase it and turn it to account. In the champlonship round Baerlein hardly seemed to be in his best form. He was, perhaps, disconcerted by the way in which Foster dealt with his service by volleying it while he was unable to make reprisals in the same manner. Further, his hitting in the railites was not as hard or as low as usual, and he occasional hard hit round the walls or a high tossed slow delivery, taking sdvantage of Baerlein's disinclination to voiley. His drop strokes were also frequent and effective.

ATHLETICS AT YALE.

Good Track Team Assured-Setback for Rowing and Baseball.

NEW HAVEN, May 8.—The Yale fine re-ceived quite a setback last week through its defeat by Tufts on Wednesday. In some ways the game will probably be highly beneficial to the team. The men went into the game in a listless fashion, and when hits meant runs they were not forthcoming. The men appeared to be overtrained as a result of the hard work terminating in the papearity and game. The outfield has been Pennsylvania game. The outfield has been shaken up considerably. Capt. Winslow went over to the freshmen and took Knox. shaken up considerably. Capt. Winslow went over to the freshmen and took knox, the left fielder, for the Tufts game, but knox could not hit and had nothing to do in the field. Cote is still benched, but many would like to see him in right field. He covers lots of ground, and is a sure pinch hitter. The infield is working well together with the exception of Huiskamp, a freshman, who is a trific unsteady at critical times. Allen, who pitched good ball at the beginning of the year, is another man who should be used more, although he is inclined to be wild.

Judging by the results of the class meet Yale seems to be almost sure of a winning track team. Capt. Class said the meet was one of the best ever held at Yale field in point of records. One of the best performances was that of Torrey, in the 100-yard run. Clapp, who was timing, caught him in 9.5-5 seconds, and all the other timers in 9.4-5. All wing for the favoring wind, it was pretty and going.

Cates, who won the low hurdles with three days' practice, will push Clapp pretty hard. Cates is a good all round man, running the quarter in 0:50 and doing about 21 feet 6 inches in the broad jump. Mike Murphy has been rather pessimistic about Parsons's ability in the time of 2 minutes 3-5 second, Mike thiriss the freshman may be a surprise in the intercollegiates.

The faculty came down hard on Capt. Cross on Tuesday when they removed Chase, Morse and Weeks from the rowing squad for deficiency in scholarship. Chase and Morse were regarded as sure 'varsity material, and if their conditions cannot be made up their places will be extremely hard to fill. Capt. Cross has allowed some of the men to go back to their class crews while the college crew is away, but hard work will be resumed to-morrow. Coaches Adams and kennedy are worried at the prospects, and intend to drive the men hard from now on.

BOY ATHLETES COMPETS.

Public School No. 40 Supplies Many Winners at Indoor Cames. Schoolboy athletes of the public schools comprising the Eighth and Twelfth school districts of Manhattan, held their aret det of games in the Twenty-second Regiment Armory, Sixty-eighth street and Columbus avenue, on Saturday night, in the presence of over 8,000 spectators... The team of Public School won a majority of the events.

School won a majority of the events.

Grim as a Stayer and Kieser.

Grim as a Stayer and Kleser.

PHILADELPHIA, May 8.—Joe Grim, the "Italian champion," met Peter Maher, at the National Athletic Club last night. He was doing business at the end of the sixth round, and though he took a terrific drubbing he was not so badly injured that he could not kiss Peter when the bell sounded. Maher showed excellent judgment trying to catch

boat, designed and built by the Herreshoff
Manufacturing Company in 1893. She is 98
feet over all, 78 feet water line, 13.9 feet beam.
5 feet draught. She has triple expansion
engines and a speed of 12 miles an hour.
The accom odations consist of three staterooms, saloon, deckhouse and bridge. The
yacht is now in Tebo's basin, in charge of
Capt. J. J. Klintworth of Petroit. She will
leave for the West just as soon as the Erie
Canal is open for navigation

Jack O'Brien Arranges a Match With Jim Seanlon.

Following this match with Kid McCoy to be decided in Philadelphia on May 14, Jack O'Brien is scheduled to meet Jim Scanlon of Pittsburg. They are to have it out in St. Louis on May 26 for fifteen rounds. Scanlon has just returned from Australia where he has been very successful, defeating all comers. If O'Brien whips Scanlon be will immediately go after Tommy Syan.

Williams Defeats New York University in Dual Games.

WILLIAMSTOWN, Mass., May 8.—Williams decisively defeated New York University is the track meet here yesterday by a score of \$6.57. Fer Williams, Leavitt, 07. did fine work winning burdles. Huribut, 07. of Williams broke the college record in the quarter nife cunning in \$1.4-5 seconds. Gutterson, 04. of Williams won the 100 yard run in 10 seconds.
